and Objectives

Support for the local
anchoring of
populations

Contacts and
organization

For more than 35 years, the humanitarian association Energies Sans Frontières has put its skills at the service of actions for the development of the poorest countries. It contributes to improving the living conditions of disadvantaged populations in these countries. The association acts to make their daily life easier by implementing projects for access to water, electricity or training. It also intervenes in post-emergency following a natural disaster for Haiti, Croatia and Greece for example.

The action of Energies Sans Frontières, an international solidarity association, is based on the commitment of its volunteers and the help of its partners and donors, all of whom contribute to the success of the actions.

Energies Sans Frontières carries out projects all over the world.

Contributions and Objectives

Our objective has been the same since 1988: the identification of the need that we make as close as possible to the populations is essential, the mutual understanding that we seek is essential, the appropriation of the project by all is necessary.

We strive to conduct our projects in the form of a school site to ensure the future of the achievements and capture the motivation of young people.

One or two years after completion, depending on the case, an evaluation is carried out to see if the objectives have been achieved, if the choices made in relation to the request have been relevant and to observe the evolution.

These interventions improve access to health and education and slow rural exodus. They also make it possible to involve local populations and craftsmen in the construction, by promoting as much as possible the purchase of materials in the country of intervention.

Over time, we have built up a network of funders: manufacturers and local authorities, equipment supplier partners and donors, who, through their loyalty and solidarity, make the realization of projects possible.

Support for the local anchoring of populations

Energies Sans Frontières intervened post-emergency after natural disasters in Iran, Pakistan, South East Asia, Haiti and Greece.

In 36 years, Energies Sans Frontières has been involved in the following countries: Armenia, Benin, Burundi Burkina Faso, Cambodia, Cameroon, Cape Verde, Comoros, Congo Kinshasa, Croatia, Ecuador, France, Greece, Haiti, India, Iran, Laos, Madagascar, Mali, Morocco, Mauritania, Nepal, Pakistan, Palestine, Peru, Romania, Senegal, Sri Lanka, Tanzania, Togo, Vietnam, with Médecins Sans Frontières in the Central African Republic and with the Red Cross in Indonesia.

CAMBODIA In 2014, a partnership agreement was signed between Energies Sans Frontières and the Association L@ Force European for the transfer of medical and humanitarian technologies (L@ f E T T-MH) for the electrical rehabilitation of the provincial hospital of Battambang. The suburban hospital which dates from the years 1863 is the healthcare center in the Battambang province which has 1,400,000 inhabitants, 66% of which live with less than 2 euros per day. Between 200 to 300 patients are neat every day in external consultations. Care is paid. New buildings have been built since without mass plan and without any provisional concern. The electrical installation does not comply with safety and regulatory standards

CAMEROON in 2016, a partnership agreement was signed between the association Education Development (AED), the Cameroon mountains University (UDM), the EDF and Energies Sans Frontières (ESF) Foundation for the construction of a solar power plant 50 kWc covering an area of approximately 1,200 m² of solar panels in Banékané connected on the 400V local triphasic installation. Energies Sans Frontières was asked for the realization of this solar power plant. In this context, an identification took place in 2018. During this first mission about fifteen people were trained in the "design and installation of a photovoltaic generator" in Banékané.

SENEGAL ASAFIN

Establishment of an ASAFIN training center where the necessary training is carried out to acquire the theoretical capacities of the beneficiaries of our solidarity actions, for all our partners in West Africa.

The "practical" complement to these training courses lies in the creation of the facilities intended for them via a "training site" system.

Laos

LAOS SEKONG

Electrification by solar energy of 3 dispensaries located in the villages of Chaling, Tan Yenne and Tatum in Dakjung district of SEKONG province.

Realization of basic electrician training in indoor installations for local technicians in each of the dispensaries in order to maintain the installations in good condition.

TANZANIA ENDULEN

Electrification by solar energy in an isolated site of all the buildings of the ST.Luke school in Endulen.

St Luke's school in Endulen trains deaf children in specific languages. It ensures throughout the year the reception of these children, who cannot follow the migrations of the Masaï families with their herds, because of the handicap.

CONGO LOUBASSA

Installation of an "Essential Services Unit" powered by floating tidal turbine, carried by Pot@ma i and partners. ESF accompanied the electrical implementation of the USE building with the commissioning of a technical room and the installation of a generator for the continuity of the electrical supply and the supply of small missing equipment. This achievement was made in the form of a school site, ESF accompanied and trained the members of "Aide à l'Enfance" in the installation and to prepare them for the electrical maintenance of the building.

VIETNAM and MADAGASCAR: Solidarity trips

These trips organized by Energies Sans Frontières on behalf of our partner CCAS (CE of electric and gas companies) led travelers to Vietnam and Madagascar to do tourism and also to visit the Energies Sans Borders Project sites already carried out. In Vietnam travelers went to training centers in Hanoi and Nam Dinh. In Madagascar, solidarity travelers were able to see ESF's achievements in the villages of Ambodiforaha and Ambanizana. From the whole trip, all keep the immersion in the villages, the moments of discussion with the inhabitant's beneficiaries of the site carried out by the association. Far from everything and especially tourist circuits

Solidarity travelers at the Nam Dinh school

VIETNAM

Since 2005, the Energies Sans Frontières association has produced short training in Vietnam in the profession of electrician for young people in difficulty. Eleven sessions have taken place in recent years and more than 250 young people have been trained by ESF in the electricity profession. In April 2021, the EPVN association with the Red Cross of VI Xuyen asked for training in the profession of electricians in domestic facilities for young ethnic minorities in the highlands in VI Xuyen in northern Vietnam. These training courses began in the summer of 2022 and will allow young people in great precariousness to become well-integrated socially integrated individuals of their own development.

Contacts and organization

Energies Sans Frontières only works with volunteers, it had 180 members in 2024. The association is represented in Rhône Alpes by its correspondents, it has three technical sites: the association's headquarters are in Seyssinet (Grenoble) and three site preparation and shipping workshops: Izeron, St Alban and Ampuis. The Izeron site hosts the administrative and accounting management. Energies Sans Frontières is an association law 1901, SIRET 425 375 128 000 13 - Code APE 94 99 Z recognized of general interest.
